Denise,

This is the status/information I have gather today;

MW-8 – the school next to parking lot is Escuela Severo Colberg. The well can be moved inside the parking lot; as such we only need the access from the municipality.

MW-9 – the community has no leader in charge of the green space so we should request the access to the municipality. The drilling crew checked the entrance though narrow the rig will fit without having to remove fences. [Área recreativa en Quintas de Cabo Rojo, Cabo Rojo, PR 00623]

MW-7 – At this location we may have to install the well in the street since the green areas at the sidewalks have either utilities or electric lines. We should request access to the municipality too.

The address is [Urb. La Concepción, calle Alida (en frente de la casa #77), Cabo Rojo, PR 00623]

MW-5 – Today that we had heavy rain for a couple of hours the area flooded. When the driller returned to do the utility clearance the water was about 3 feet high in the area where we would have to drill because of nearby electric lines and location. That would explain why there is no development in this area being so close to town. We ask around and no one seems to know the owners. There is a possibility that some clearing will also have to be done in the green area. Maybe we should be thinking in finding an alternate location for it, if we don't find the owner and have to deal with flooding in order to maintain the schedule.

MW-11 – We did a utility clearance but are not sure if the green area in the northeastern most corner of Walgreens is theirs or if it is public land. Access from Autoridad de Carreteras?? :/ If we drill the well in their parking lot we will have to close the whole area and aloud no traffic near the rig. Either way we will do a flush mount. Will go over their store drawing to look for any property limits information.

We have tried as much as possible to battle the rain from most of the day, tomorrow hopefully we will be able to revisit some of the locations and found out more information.

Thanks,

Frances Delano, P.G.
